

Incident Management Situation Report
Monday, June 9, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity (June 6, 2025 – June 8, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (203 fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires:	5
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker, one incident management team, five fire suppression crews and 34 overhead personnel are assigned to large fire support in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

TOTAL FIRES:		1,362	349	125	164	26,059	1,471	29,530
TOTAL ACRES:		103,471	15,304	39,812	20,811	938,296	133,747	1,251,440

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	22,508
Acres (2015 – 2024 as of today)	1,274,771

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Well above normal temperatures will continue across the northern half of the West with minimum relative humidity as low as 10% in the lower elevations of the Intermountain West. Locally breezy westerly Cascade Gap winds will gust to 35 mph across the Oregon and Washington Cascades into the western Columbia Basin. Isolated mixed wet and dry thunderstorms will develop across northern California into south-central Oregon, and from the Sierra through central Nevada to the Four Corners. Very dry conditions with above normal temperatures will persist in the Mojave and Sonoran Deserts with poor overnight recovery for mid-slopes and ridges. Isolated dry thunderstorms are expected across the Gila Mountains of New Mexico, with isolated to scattered mainly wet storms near and east of the New Mexico central mountains. Scattered showers and thunderstorms will develop along a cold front from central Texas to the Lower Mississippi Valley then north and east into Appalachians and eastern Great Lakes. Isolated to scattered showers and thunderstorms will also develop in the Southeast, while scattered showers persist in the Upper Great Lakes. A warmer and drier trend will begin in the western Interior of Alaska today, but cooler than normal temperatures and scattered showers will continue in the eastern half of the state. Light to moderate trade winds are expected across Hawai'i today with continued dry conditions and only a few light windward showers.
